

## Sea Kayaking and Nordic Skating – Search Explore and Discover

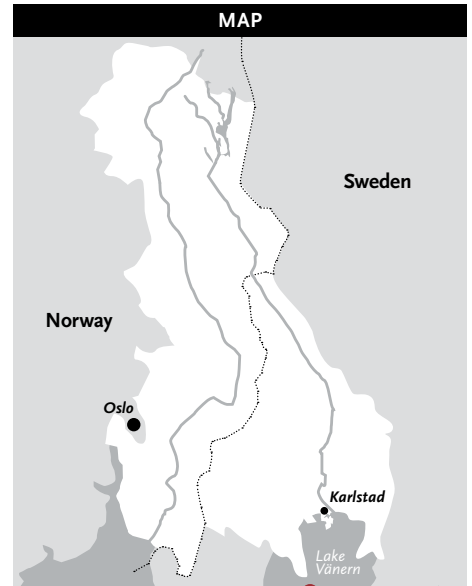

From the kayak horizon, sitting low in the water, the contact with nature and animals is something you never will forget. Feel the peacefulness that slow, soft and safe paddling gives you. In wintertime Nordic Skating gives you amazing experiences on free and open ice – not on tracks or other man made ice ways. We explore the very special nature and culture in Lurö Archipelago Lake Vänern - the largest fresh water archipelago in northern Europe. Experienced and adventurous guides tour you off the beaten track in water and on ice. Wilderness, silence and vast water lands are awaiting you.
